

An introduction of Oz Web 3.0 gaming ecosystem and tokens OZC & TOTO

Greetings from the land of Oz, somewhere over the rainbow!

Come and get the best entertainment experience possible!

A Web 3.0 gaming ecosystem integrating payment, asset management & entertainment.

1. Oz Eco Structure

1) Ozfund (DAO)

Ozfund is the Oz foundation, which is a DAO that builds, develops, and maintains the Oz Web 3.0 gaming ecosystem. In the early stage, ozfund members consist of key developers of each product. Ozfund is committed to improving the ecological infrastructure and participating in the transformation and upgrading of the ecology, providing a portal for more merchants and users to enter the Oz world. The main products managed by Ozfund now include auPay and Ozbet. Users can buy or swap OZC on ozfund.one. Users can also stake OZC to get TOTO on Ozfund's official website.

Official Website: ozfund.one

2) Ozbet (Online Casino)

Ozbet is an innovative Web 3.0 blockchain Online Casino & Gambling Application dedicated to making crypto assets safer, betting fairer, and services better for users worldwide. Ozbet's chips, OZC, and membership tokens, TOTO, together form a blockchain gaming ecosystem, where OZC and TOTO holders can enjoy a comprehensive entertainment experience, a well-established membership system, and the ultimate community service, as well as share the benefits of the Oz products.

Official Website: ozbet.one

3) OZC & TOTO (Tokens)

OZC(Ozcoin) and TOTO are the tokens of Oz ecosystem. They are issued and circulated in the global gaming industry and can be applied to the consumption of gambling products, account settlement, financial business support, and payments between enterprises. In the near future, the usage of OZC and TOTO will be extended in more areas of the gaming industry and peripheral service scenarios.

OZC address

BEP20: 0xc1b93a0076Cee05dFe01caA08Ca726Bc2D881b95

TOTO address

BEP20: 0x88468dbDd08bf76b45C512d5d30048d70B3F2b00

4) auPay (Payment System)

auPay provides payment tools for the Oz ecosystem and is dedicated to promoting the globalization of digital payments, securing the crypto assets of all users, and enabling the efficient transaction among products, users, applications and services. The auPay payment system is a crypto asset clearing center for enterprises and an infrastructure for cryptocurrency transactions and settlements. It also offers comprehensive solutions for enterprise asset management.

2. Oz Token Economics

(1) OZC Token Model

OZC (short for Ozcoin) is a chip issued in the Oz ecosystem. Anchored to multiple USD stablecoins, OZC can be used for various service including betting and gambling on Ozbet, as well as purchasing merchandise in Oz shopping applications. Ozcoin is required for users to upgrade the Oz membership and enjoy a variety of benefits. OZC can also be staked to mine TOTO. The USD stablecoins can be redeemed with OZC on both ozfund and ozbet website at any time.

1) OZC Contract Info

Full Name: Ozcoin

Ticker:OZC

Network : BSC mainnet

Token Standard: BEP 20

Precision: 18

Smart Contract Address: 0xc1b93a0076Cee05dFe01caA08Ca726Bc2D881b95

Explorer: <https://bscscan.com/token/0xc1b93a0076Cee05dFe01caA08Ca726Bc2D881b95>

2) OZC Issuance

OZC is a chip anchored with a variety of USD stablecoins. 1 OZC will be issued when a user trying to buy or swap a chip with 1 USD stablecoin . Now users can use BUSD to get OZC 1:1 on the official website of Oz Foundation ozfund.one and the gambling application ozbet.one. As the Oz world expands in the future, OZC will also cooperate with blockchain projects to improve its asset management mechanism so that users can participate in the entertainment of the Oz ecosystem more conveniently.

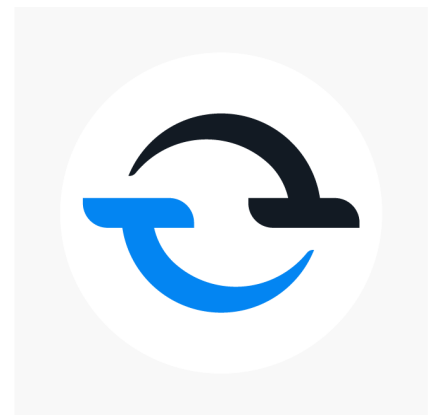

3) OZC Burn

The USD stablecoins can be redeemed with OZC on both ozfund and ozbet website at any time. After the stablecoins are redeemed, equal amounts of OZC will be burnt to make sure that the value of OZC in circulation is less than the platform's USD stablecoin reserve.

(2) TOTO Token Model

TOTO is a membership and government token in the Oz ecosystem that can be obtained by staking OZC, or by gambling and betting with OZC.

TOTO can be used in diverse betting scenarios, and is also used as a management tool in the Oz ecosystem for platform governance. TOTO has a variety of burn mechanisms. Every day the entire profits of the Ozbet would be used for the buyback and burn of TOTO. Users betting with TOTO in games will also trigger TOTO's multiple burn mechanisms.

1) TOTO Contract Info

Full Name: TOTO Token

Ticker: TOTO

Network : BSC mainnet

Token Standard: BEP 20

Precision: 18

Smart Contract Address: 0x88468dbDd08bf76b45C512d5d30048d70B3F2b00

Explorer: <https://bscscan.com/token/0x88468dbDd08bf76b45C512d5d30048d70B3F2b00>

2) TOTO Issuance

Ozfund decided to open TOTO pre-sales to gather supporters and funds in the early stages of the ecology building process. The TOTO Pre-sale started at 9:00 am (UTC+8) on Sept-18-2022. The pre-sale price was 1 TOTO = 0.1 BUSD and the daily pre-sale quantity is capped at 1 million.

After the main betting product Ozbet is live, TOTO will be issued with a production volume of 10,000,000 (ten million) on the first day and a decreasing trend with the output of the second day being 99.99% of the previous day. When the daily production volume of TOTO reduces to 1,000,000 (one million) per day, the output will no longer decrease.

The TOTO distribution would be:

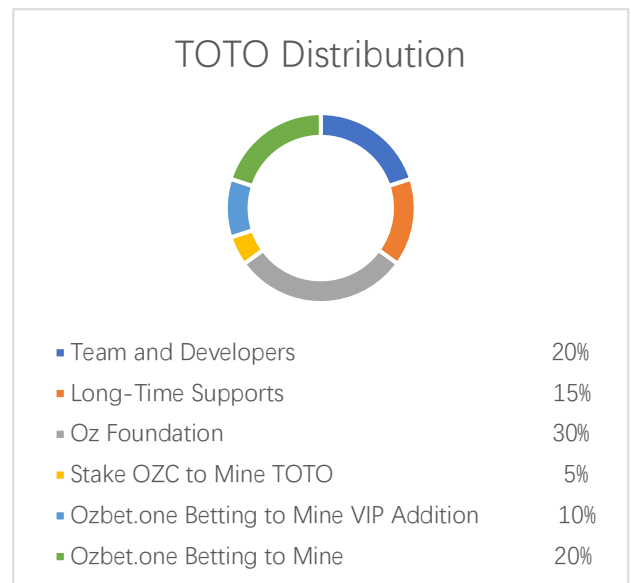

Team and Developers: 20 %

Long-Time Supports: 15 %

Oz Foundation: 30 %

Liquidity Pools:

Stake OZC to Mine TOTO	5%
Ozbet.one Betting to Mine	20%
Ozbet.one Betting to Mine VIP Addition	10%

- Team & Developers' TOTO will be used to pay salaries and hire staff;
- Long-term supporters' TOTO will be locked up for 3 years;
- TOTO held by the Oz Foundation will be used as an ecological reserve for platform building, product operations, business outreaching, promotions, etc.
- 5% of the TOTO will go to OZC stake pool, with a lock-up period of 3 years;
- 30% of the TOTO will be paid out as a rebate based on the percentage of the user's bets on a day at Ozbet. VIP users will share additions.

3) TOTO Burn

In order to control the amount of TOTO in circulation and drive the relative price of TOTO, Ozfund will burn TOTO in various forms, including but not limited to:

- 1) Opening the Oz Prize Pool and applying all Ozbet profits to TOTO buyback and burn. Ozbet users redeeming OZC within the platform will need to consume the cashflow in accordance with gambling rules before withdrawing the OZC asset to users own wallet, while Oz ecological TOTO holders can redeem and withdraw TOTO and OZC to their own address directly at Ozfund.

- 2) The burn mechanism is also set up in the gambling games, certain percentages of TOTO will be burned after the user betting with TOTO.
- 3) Ozfund will launch DAO voting from time to time, and implement a special buyback & burn plan after discussing with the community.

4) TOTO' s Value Assurance

As a membership token to the Oz ecosystem, TOTO has strong value assurance. Users can use TOTO to participate in Ozbet's sportsbook, eSports, TOTO lottery, slots, live lotteries, video games and other entertainment sections, as well as purchase crypto assets such as NFT artwork and enjoy diverse membership services within the Ozbet platform.

Besides, the value of TOTO will be anchored to the operations of the Oz ecosystem, and both community supporters and gaming users will be able to swap TOTO for OZC (1 OZC = 1 BUSD) in Ozbet's Oz Prize Pool at any time. As the Oz ecosystem expands, TOTO will also be partnered with other blockchain projects and listed on exchanges. Users can get TOTO in multiple Dexes or withdraw TOTO to the centralized exchanges for sale.

3. Oz Eco Roadmap

(1) Construct Innovative Ecosystem

The Oz ecosystem integrates conventional gaming products with blockchain and crypto assets, improving and simplifying the process of online betting and entertainment for users to great extent. Oz will enrich the entertainment approaches for users and gradually build a brand-new Web 3.0 gaming ecosystem, providing a land on the blockchain where people can deeply participate and enjoy a perfect service and entertainment experience.

(2) Brief Intro of the Gambling Industry

Gambling and gaming is a global industry. Research by Sportradar, an authoritative gaming data provider, shows that the global gaming industry has an annual market value between \$700 billion and \$1 trillion, with a trend of year-on-year growth. In recent years, online gambling products have gradually reached users from the world, which increased the market size of the whole industry. Today, the market share of online gaming has also surpassed that of the offline gaming industry. The gambling industry is experiencing consolidation and upgrading due to the introduction of blockchain technology and the use of crypto assets, and many online platforms are starting to be compatible with mainstream crypto assets, such as USDT and BTC. It is believed that in the near future, blockchain technology will be more fully involved in the payment and financial settlement of the gaming ecosystem. Thus, how to build the Web 3.0 infrastructure and product layout of the gaming ecosystem is a question worth thinking.

(3) Pain Points of the Gambling Industry

Currently, the online gambling industry faces a number of fundamental issues that need to be addressed:

- 1) The legal provisions and financial policy restrictions in different regions lead to high costs and potential risks in the gambling industry.
- 2) The tightening of cash flow channels for gaming products and the lack of available cash flow resources under market control.
- 3) There are concerns about the integrity and fairness of betting platforms, and users have doubts about the security of assets held in custody on gambling products.

4. Oz Eco Solution

Taking tokens as the management tools for all eco-products, the Ozfund Foundation uses OZC and TOTO together with the auPay settlement system to build well-established entertainment production lines and provide complete service packages:

- Develop a new type of gaming system and integrate gaming products with blockchain technology
- Expand the application scenarios of crypto assets in the gaming industry, create gambling and financial products, and enable participants to earn through play
- Use crypto asset settlement to reduce the cashflow cost and improve cashflow efficiency in the gaming industry
- Keep the information transparent and traceable by using blockchain technologies and protect users funds and privacy from policy risks
- Cooperate with major resource parties in the gaming industry, including Betrader, etc. Launch new standards and brand values on the blockchain together with the authoritative governing bodies of the gaming industry in each region. Integrate cashflow and user resources to promote new perceptions of the gaming industry.

Advantages of OZC and TOTO:

- The token models allow Oz Eco to establish an innovative financial system for crypto assets in the gaming industry. Using auPay which can complete the payment and clearing of OZC, TOTO, BTC, ETH and other mainstream crypto assets, Oz can create several business-oriented financial platforms, reduce the financial costs of gaming, avoid policy risks, improve the operational efficiency, and ensure asset security.
- On top of the crypto asset settlement, auPay and Ozbet will be used to create a true Web 3.0 gaming ecosystem which will integrate high-quality products and services, form an industrial effect, establish a widely recognized cryptocurrency gaming standard, and ultimately complete the upgrade of the entire industry.

5. Oz Eco Blueprint

(1) Timeline

2022.8	Ozfund.one launched and TOTO pre-sale started
2022.9	Ozbet Beta version and TOTO official release
2022.11	World Cup campaigns
2022.11	Ozbet 1.0 release
2023.1	MEL (SEL) eSports league
2023.3	NFT release, with physical blind box, sports and eSports team signatures, etc.
2023.5	Metafun Shopping Mall will be open for OZC and TOTO holders
2023.7	DAO Autonomy Strategy 1.0
2024.5	Dorothy Web 3.0 Café

(2) Coming Soon

1) NFT

Ozbet will hold multi-mode tournaments with sports and e-sports teams and cooperate in issuing NFTs. The platform will further develop the NFT trading and staking system to expand the application scenarios of OZC and TOTO.

The tasting and collection of artworks is one of the additional services provided to users in the offline gaming industry. As a gaming application on the blockchain, Ozbet will continue to explore and evaluate the functions and values of digital artworks, improve the online gaming experience, and create a gaming Metaverse.

2) DAO

Community is an essential part of web 3.0 applications, and the Oz Eco hopes to get real feedback from the user side and provide a comprehensive entertainment service for every member. Therefore, ozfund will establish a DAO system based on membership levels and TOTO holdings, allowing more community supporters to join the decision-making process. The revenue of the Eco will also be shared based on the contribution of DAO members.

3) Industry Interactions

In addition to online entertainment and betting, high-end consumer exhibitions, tourism are also important components of the gaming industry. Oz Eco will allow users to participate in the services and consumption of all casino merchants and entertainment platforms contracted with auPay worldwide through cell phones, user secret keys and identity cards. The Oz membership system will offer Oz users to enjoy 7x24 multilingual online services from the customer service center. High-ranking members will also have 7x24 online personal assistants.

The projects that are advancing in cooperation are:

- USA: Las Vegas Westgate, Las Vegas Resort & Casino, MGM Grand
- The Philippines: Solaire Resort & Casino Manila, City of Dreams Manila, Okada Manila, Inside Asian Gaming, HTH
- Macau: Wynn Palace, The Parisian Macao
- Angola: CASINO VENICE
- Cruises: Royal Caribbean Cruises

6. Join Oz Eco, Build Together

(1) Team

The Oz team is made up of a number of entrepreneurs and developers who have been working in the gaming industry, blockchain and internet companies for several years, and has a solid foundation in building ecological systems with rich practical experience.

The Oz developer team is still expanding, and with the construction of the Ozfund DAO, Oz welcomes more supporters to participate in the ecology building process. Community members interested in joining the team can submit their resumes to: careers@ozfund.one

(2) Partner

- Mayfair
- Asian Logic → Asian BGE → Oneworks → mixbot
- Raybet
- dafabet
- Pgsoft
- Pinnacle
- mrcat
- letou
- niugames → HLTV
- 1Xbet

Oz is always willing to establish multi-faceted cooperation with more gaming, sports, e-sports and blockchain partners. Please feel free to contact us through email: business@ozfund.one
